About Us
ALBA Integrated Waste Solutions (HK) Ltd. (ALBA IWS) is a specialist in waste electrical and electronic equipment (WEEE) management. We are a joint venture company established between the recycling specialist ALBA Group, a leading recycling and environmental services company from Germany and Integrated Waste Solutions Group Holdings Limited (IWS), a local solid waste management service provider.

About the Project
ALBA IWS has been engaged by the Environmental Protection Department to design and build the Waste Electrical and Electronic Equipment Treatment and Recycling Facility (WEEETRF), provide a collection service and operate the facility until 2027. We combine leading German technology and local operational experience, and are dedicated to providing a sophisticated E-waste management service to individuals and organisations. We will provide an integrated one-stop-solution from the establishment of a comprehensive E-waste collection network to processing materials in an environmentally sound manner, ultimately redefining the public concept of E-waste recycling in Hong Kong. The WEEETRF is anticipated to be opened in mid-2017.

Scope of Services

Collection
Treatment
- Compliance with environmental laws and regulations

Community Engagement
- Education Centre
- Donations

About the Producer Responsibility Scheme (PRS)
Hong Kong generates about 70,000 tonnes of E-waste a year. Responding to public calls to improve electronic waste handling and disposal, the Government has introduced a mandatory Producer Responsibility Scheme on WEEE that will start in 2017.

Regulated Electrical Equipment (REE) includes the following items:

- Air Conditioner
- Washing Machine
- Refrigerator
- Television
- Scanner
- Monitor
- Computer
- Printer

A One Stop Solution for E-waste Disposal

1. Multiple Drop-off Points

2. Online Self-order Platform & Hotline Service
   • E-waste Collection Hotline: 2676 8888
   • On-Site E-waste Collection Service
   • Full tracking and reporting system

3. Territory-wide Collection Network
   • Multiple RCCs
   • Controlled storage facility

4. Advanced Treatment Technology
   • State-of-the-art German technology
   • Safe handling and disposal of hazardous substances contained in E-waste

5. Refurbishment & Donations
   • Reduce wasteful disposal of E-waste by refurbishing reusable electronic items
   • Donate refurbished items to deserving families via NGOs

6. Sustainable Supply of Raw Materials
   • Exceptional recycling rates of over 80%
   • Produce secondary raw materials
   • Output materials include aluminum, copper, plastics and others
   • Return resources into the economic cycle
